The year 2015 marks 15 years of partnership between Inmarsat and Télécoms Sans Frontières.

In 15 years, we have achieved great things. Inmarsat has remained by our side through missions in over 70 countries, in the aftermath of the most devastating natural disasters and during some of the world's most harrowing conflicts.

Thanks to your support, TSF has been able to offer lifelines for hundreds of thousands of people across the world. Beyond reconnecting families, the support of Inmarsat has allowed us to improve the emergency response of more than 800 humanitarian organisations and United Nations agencies by facilitating the coordination of health care, the repatriation of victims and the distribution of life-saving supplies such as shelter, food and medication.

In being the very first partner of TSF, Inmarsat has allowed us to intervene across the four corners of the world. Our partnership is unique and our objectives shared. Together we engage to provide “Communications for life”.
